

PATENT 7,430,066  
Do. No. 9585-0188

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Patent No.: 7,430,066  
Issued: September 30, 2008  
Inventor: Hsu et al.  
Serial No. 10/626,200  
Filed: July 22, 2003  
For: METHOD AND USER INTERFACE FOR PERFORMING AN AUTOMATIC SCAN OPERATION FOR A SCANNER COUPLED TO A COMPUTER SYSTEM

REQUEST FOR CERTIFICATE OF CORRECTION

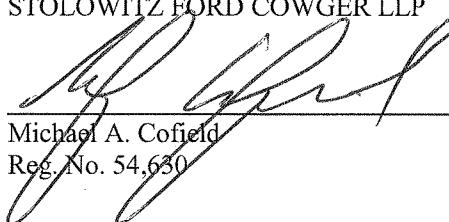

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

The patentee requests the correction of errors identified on the accompanying Certificate of Correction be made on the above-identified patent. The errors appear to be made by the U.S. Patent and Trademark Office, and the patentee believes a request for correction of a patent under 37 CFR §1.322 does not require a fee. A copy of the Certificate of Correction should be sent to the undersigned at the address listed below.

Please contact the undersigned at the telephone number listed below if there are any remaining issues or questions.

Customer No. 73552

Respectfully submitted,  
STOLOWITZ FORD COWGER LLP

  
Michael A. Cofield  
Reg. No. 54,630

STOLOWITZ FORD COWGER LLP  
621 SW Morrison Street, Ste 600  
Portland, OR 97205

PATENT NO. : 7,430,066

APPLICATION NO.: 10/626,200

ISSUE DATE : September 30, 2008

INVENTOR(S) : Hsu et al.

It is certified that an error appears or errors appear in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

At column 5, line 40, please replace "scan to said" with --scan operation to said--.

At column 5, line 56, please replace "obtained speei4ied" with --obtained--.

At column 5, line 58, please replace "A user interface implemented on a computer system, the user interface comprising: a means for performing a primitive scan operation on a document based on a set of default image processing settings to obtain a primitive scanned image; means for performing a set of image processing routines on the primitive scanned image to obtain image qualities of the document, the image processing routines including determining whether the primitive scanned image represents text characters; means for obtaining a set of image processing settings for the document based at least in part on the obtained image qualities; and means for performing a second scan on the document based at least in part on the specified image processing settings." with --The user interface of claim 7, wherein the obtained image processing settings are obtained in accordance with the obtained image qualities of the document--.

At column 6, line 12, please replace "The user interface of claim 8, wherein the specified image processing settings are obtained in accordance with the obtained image qualities of the document." with --The user interface of claim 7, wherein the computer system is further adapted to execute an application program--.

At column 6, line 15, please replace "claim 7" with --claim 9--.

At column 6, line 17, please replace "claim 7" with --claim 9--.

At column 6, line 19, please replace "The user interface of claim 9, wherein the application program comprises an image editing program." with --The user interface of claim 9, and further comprising transferring an image obtained from the second scan operation to said application program--.

At column 6, line 21, please replace "A computer-readable storage medium having stored thereon instructions which, when executed, perform a method, comprising: performing a primitive scan on a document based on a set of default image processing settings to obtain a primitive scanned image to provide to the scanner driver; performing a set of image processing routines on the primitive scanned image to obtain image qualities of the document, the image processing routines including determining whether the document includes color images; specifying a set of image processing settings for the document based at least in part on the obtained image qualities; and performing a second scan on the document based at least in part on the specified image processing settings." with --A computer-readable storage medium having stored thereon instructions which, when executed, perform a method, comprising: performing a primitive first scan on a document based on a set of default image processing settings to obtain a primitive scanned image to provide to the scanner driver;--

 Portland, OR 97205

This collection of information is required by 37 CFR 1.322, 1.323, and 1.324. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 1.0 hour to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: **Attention Certificate of Corrections Branch, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

## UNITED STATES PATENT AND TRADEMARK OFFICE CERTIFICATE OF CORRECTION

Page 2 of 2

PATENT NO. : 7,430,066

APPLICATION NO.: 10/626,200

ISSUE DATE : September 30, 2008

INVENTOR(S) : Hsu et al.

It is certified that an error appears or errors appear in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

(cont.)

performing a set of image processing routines on the primitive scanned image to obtain image qualities of the document, the image processing routines including determining whether the document includes color images; ¶ specifying a set of image processing settings for the document based at least in part on the obtained image qualities; and ¶ performing a second scan operation on the document based at least in part on the specified image processing settings.

At column 6, line 45, please replace "A scanner to perform a primitive scan operation on a document based on a set of default image processing settings to obtain a primitive scanned image; circuitry to perform a set of image processing routines on the primitive scanned image to obtain image qualities of the document, the image processing routines including automatic character recognition; circuitry to obtain a set of image processing settings for the document based at least in part on the specified image processing settings." with --a scanner to perform a primitive scan operation on a document based on a set of default image processing settings to obtain a primitive scanned image; ¶ circuitry to perform a set of image processing routines on the primitive scanned image to obtain image qualities of the document, the image processing routines including automatic character recognition; and ¶ circuitry to obtain a set of image processing settings for the document based at least in part on the obtained image qualities.--

At column 6, line 55, please replace "the specified image" with --the obtained image--.
